UV PROTECTION, MULTIFILAMENT POLYESTER SEWING THREAD

A&E's Sunstop® is a high performance multifilament polyester sewing thread, offering advanced ultra-violet light protection. Sunstop® is ideal for outdoor applications where seam strength retention and fade prevention during UV exposure are required.

Sunstop® is also available in non-wick to help diminish moisture migration through the seams. Finishes include: Bonded, SST (Stretched), and STX (Non-Stretched).

## BENEFITS

**ADVANCED UV PROTECTION** — Sunstop® features advanced ultra-violet light protection, reducing strength degradation over traditional filament polyesters and color loss through fading.

**SUPERIOR SEWABILITY** — Sunstop® has good overall seam strength, a consistent diameter, and excellent ply security. These features provide for a superior, consistent sewing performance with fewer sewing interruptions.

**COLOR AVAILABILITY** — Sunstop® is available in popular, standard marine and outdoor shade colors for maximum color selection versatility.
