A&E's global continuous filament threads

A&E RECEIVES GORE-TEX® 2009 VENDOR CERTIFICATION FOR FOOTWEAR

After comprehensive lab testing, W.L. Gore has awarded A&E their 2009 Recommended Vendor Certificate for our Anefil® DRY non-wick sewing threads. This A&E non-wick thread will help significantly reduce leaking on water-proof shoes and boots with the GORE-TEX® label.

Anefil® DRY

A&E's global continuous filament threads

Anefil® Nylon DRY

Tex Size	Metric Size	Yarn Construction	Old Tkt.	USGov Size	Finish	Avg. Strength (lbs)	Avg. Strength (grams)	Minimum Ndl. Size (metric)
70	40	210dX3	69	E	BT, SST, STX	11.3	5130	110
90	30	210dX4	92	F	BT, SST, STX	15.2	6877	120
135	20	420dX3	138	FF	BT, SST, STX	23.8	10796	140

* All strengths are for comparative purposes and should not be used as minimum requirements.

Anefil® Poly DRY

Tex Size	Metric Size	Yarn Construction	Old Tkt.	USGov Size	Finish	Avg. Strength (lbs)	Avg. Strength (grams)	Minimum Ndl. Size (metric)
70	40	220dX3	69	E	SST, STX *	10.0	4554	110

* Anefil® Poly DRY - BT is only available from China and not in the Americas at this time.

**A&E prewound bobbins
are also available in most
bobbin sizes used in sewing
footwear.**

BENEFITS

- **Bobbin to Bobbin Uniformity**
- **Even Tension**
- **Consistent Tack**
- **Consistent Yardage & Run-out**
- **15 - 20% more yield than machine wound bobbins**
- **Fewer Bobbin changes**
- **Increased Productivity**
