

ANECORD POLY®

BONDED MONOCORD, POLYESTER SEWING THREAD

Laying flatter in the seam for low profile stitching, A&E's Anecord Poly® delivers superior abrasion resistance and better UV resistance than nylon and polyamide sewing threads. Manufactured with a bonded, monocord construction, Anecord Poly® is ideal for low-profile stitch applications, displaying good overall seam strength. This thread provides added value, producing a higher yield over twisted polyester products.

Prewound bobbins are available.

BENEFITS

UV RESISTANCE — Delivers a better resistance to ultraviolet light exposure over traditional nylon and polyamide sewing threads.

SUPERIOR SEWABILITY — Engineered to provide good overall seam strength and a superior sewing performance. This thread boasts excellent ply security with a consistent diameter and low moisture regain.

VERY GOOD COLORFASTNESS — Displays good colorfastness with good color resistance. Available in a wide range of popular colors.

HIGHLIGHTED USES

- Specialty Industrial
- Filtration Products
- Geotextiles
- Footwear
- Outdoor Products
- Furniture
