ANEFLEX™

HIGH ELONGATION, PBT SEWING THREAD

A&E's Aneflex™ sewing thread delivers highly elastic seams, without compromising seam strength. Developed from Polybutylene Terephthalate (PBT), Aneflex™ is an innovative thread solution for stretch garments constructed from highly extensible fabrics in all major stitch types. For products in which seam performance depends on extensibility, trust Aneflex™.

HIGH ELASTICITY

Produced from extensible PBT filament yarn, this thread provides significantly higher elongation than other sewing threads of the same size.

GOOD SEWING PERFORMANCE

High initial modulus contributes to a good overall sewing performance when used as a needle or bottom thread and in all major stitch types.

VERY GOOD COLORFASTNESS

Displays very good colorfastness and laundering durability performance with good chemical resistance, including chlorine bleach.
