ANEFIL™ REFLECTOR

REFLECTIVE CORE, POLYESTER SEWING AND EMBROIDERY THREAD

Eco-Driven®

RSL
APPROVED

Engineered for reflective, decorative visibility, A&E's innovative Anefil™ Reflector sewing and embroidery thread provides luminescence and durability, while maintaining aesthetic appearance in garment and fashion apparel applications. Anefil™ Reflector is primarily used for creating reflective overedge seams, but this innovative thread's smaller size is also regularly used to create decorative embroidery embellishments. Multiple put-ups are available for added convenience and optimal payoff.

REFLECTIVE PROPERTIES

This thread's reflective core bounces light back to a light source, helping to ensure visibility of decorative elements in low light environments.

IDEAL FOR DECORATIVE SEAMS

Designed for use coverstitch and overedge stitch applications, this thread creates attractive, reflective seams and embroidered enhancements.

SIZE AND FUNCTIONALITY

Available in Tex 60 and Tex 120, this thread delivers design and functionality to sewing and embroidery applications that have traditionally only incorporated tape as a reflective element.
