SUNSTOP®

UV PROTECTION, MULTIFILAMENT POLYESTER SEWING
AND EMBROIDERY THREAD

A&E's Sunstop® is a high-performance multifilament polyester sewing and embroidery thread designed for exceptional performance in outdoor settings. With advanced ultra-violet light protection, Sunstop® ensures that seams retain their strength and resist fading under intense UV exposure. For embroidery applications, Sunstop® offers the same superior UV protection in a finer thread size, perfect for creating fade-resistant monograms.

Offered in BT (Bonded) and SST (Stretched) finish options to suit specific needs, Sunstop® is also available in non-wick to minimize moisture migration through seams.

ADVANCED UV PROTECTION

This sewing thread features advanced ultra-violet light protection, reducing strength degradation over traditional filament polyesters and color loss through fading.

EXCELLENT SEWING PERFORMANCE

Engineered to provide an excellent sewing performance, this thread boasts excellent ply security with a consistent diameter and low moisture regain when bonded.

COLOR AVAILABILITY

This sewing thread is available in popular, standard marine and outdoor shade colors for maximum color selection versatility.

**OUTDOOR PRODUCTS • MARINE • AUTOMOTIVE • AWNINGS • TENTS
• SHADE SAILS • PATIO FURNISHINGS • UMBRELLAS**
