ANEBRAID®

BRAIDED MULTIFILAMENT POLYESTER SEWING THREAD

Ask your A&E sales representative about available product with this certification.

Engineered to provide durable, gorgeous, raised seams on footwear, leather, and upholstery, A&E's Anebraid® sewing thread is constructed with continuous braided multifilament polyester. Thermally resilient due to its heat-repellent preparation, needle heat is dissipated quickly to ensure performance factors are met during sewing. Anebraid® is available in a lubricated and/or a waxed finish for footwear sole-stitching. Should a recycled variant be preferred, ask your sales representative about Anebraid® ECO100 manufactured with 100% recycled braided polyester.

BRAIDED, RAISED STYLE

Delivering strength in the seam, this thread provides a beautiful, decorative, raised look for functional, durable seams.

EXCELLENT SEWING PERFORMANCE

Engineered to provide an excellent sewing performance, this thread sews efficiently in a variety of leather applications.

VERY GOOD COLORFASTNESS

Displaying good colorfastness with good color resistance, this sewing thread is available in a range of popular colors.
