PERMA CORE®

POLYESTER WRAPPED, POLYESTER CORE SEWING THREAD

Ask your A&E sales representative about available product with this certification.

Heavily utilized as an all-around industrial thread in many industries, Perma Core® maximizes seam quality and minimizes sewing problems. Manufactured with a continuous filament polyester core and a polyester staple wrap, this thread provides great strength and superb abrasion resistance versus staple spun products.

Perma Core® is available in a silicone free finish to help negate the potential for lube migration into sensitive fabrics. Ask your A&E representative for more details.

HIGH TENSILE STRENGTH AND ABRASION RESISTANCE

Engineered for durability, this thread delivers great seam integrity, while providing good seam strength and abrasion resistance.

EXCELLENT SEWING PERFORMANCE

This product provides for an excellent sewing performance on manual and automatic multi-directional sewing machines.

VERY GOOD COLORFASTNESS

Displays very good colorfastness and laundering durability performance with good chemical resistance, including chlorine bleach.
