REPEL™

WATER REPELLENT ENHANCEMENT FOR SEWING
AND EMBROIDERY THREAD PRODUCTS

When quality thread products require a splash of sustainable, water repellency and no effect on thread color, A&E's REPEL™ is a trusted solution. REPEL™ delivers a liquid repellent feature to any of A&E's quality thread products, while keeping the environment in mind. Ethically produced, REPEL™ does not contain any PFOAs, providing true PFC-Free, water repellency to the A&E thread product of your choice.

For non-wicking, water repellency, contact your representative to inquire about A&E's Anafil Nylon® Dry thread product.

WATER REPELLENT

Sustainably manufactured, REPEL™ responsibly enhances A&E thread products to repel water and other liquids.

CONTAINS NO PFCs

As a designated PFCZERO™ product, REPEL™ does not contain any perfluorochemicals. This includes C8 perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), C6, and C4 chemistry.

THIRD PARTY TESTED ON SEAM

REPEL™ meets requirements for rain test method: ISO 22958-2005 / AATCC 61.
