MAGIC®

AIR-ENTANGLED, POLYESTER SEWING THREAD

Ask your A&E sales representative about available product with this certification.

An air-entangled 100% polyester sewing thread, A&E's Magic® is designed as a high-performance alternative to spun polyester threads. Magic® creates a lower profile seam reducing potential for surface abrasion. Manufactured with a special finish, twist, and combined with a high initial modulus, Magic® delivers an excellent sewing performance. This allows for larger put-ups for long, continuous sewing runs without thread changes.

ABRASION RESISTANT

Flat and ribbon-like, this thread creates a lower profile seam, reducing the potential for surface abrasion, like needle cuts and cut stitches.

EXCELLENT SEWING PERFORMANCE

This product displays an excellent and consistent performance on manual and automatic multi-directional sewing machines with fewer sewing interruptions.

VERY GOOD COLORFASTNESS

Delivering very good colorfastness, this thread product is consistent in color from cone to cone, minimizing needed machine adjustments.
